Question 4

1 point possible (graded)

```
body {  
font-family: "Century Gothic", Arial, sans-serif;  
}
```

What will happen to the text affected by the following CSS rule?

The browser will try to use each font, starting with Century Gothic and moving to the right until it finds a supported font.

The browser will try to use each font, starting with sans-serif and moving to the left until it finds a supported font.

Text will use all three different fonts based on the different tags it lives within.
